About the Gen AI Course

Generative AI creates new content such as text, images, audio, and code. Unlike traditional AI, it can generate new outputs from learned patterns. Businesses use it for content, research, support, and automation. At Whalecourse Technologies, our course covers prompt engineering, AI tools, LLMs, and real-world Gen AI applications through practical learning.

Student Success Stories

Before joining, I had only a basic idea of AI. The training helped me understand how Generative AI works in a much clearer way. Practicing prompts and trying different tools helped me learn faster and use AI for everyday tasks confidently.

Karthi C
AI Engineer

My trainer explained each topic clearly and gave useful feedback during practice. When I had questions about prompts or AI tools, the guidance helped me correct mistakes and complete tasks with more confidence every single day.

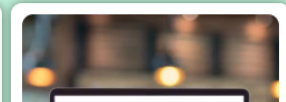

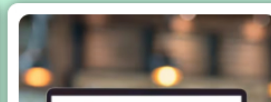

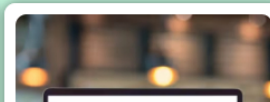

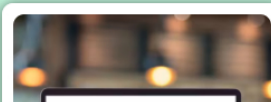

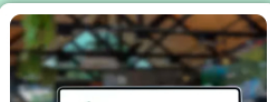

Peerthi K
Student

Working on small AI projects helped me understand how these tools can support real work. Whalecourse Technologies also provided interview practice, which helped me explain my projects and feel better prepared for career opportunities.

Aravinth T
Prompt Engineer
